

Technology Team Support Priorities

MSAD No. 75 has developed a complex Information System providing direct support to every student and staff member in the district.

The first priority of the technology staff when responding to support needs is to the systems that ensure and or promote the physical health and safety of the staff and students of the district. These systems ensure quality air, necessary heat, ventilation, air conditioning, provides medical and health information to school nurses and administration, identifies the locations of students while in school and traveling on the bus, protects students while surfing the Internet, and secures confidential information.

The second priority is to the core administrative needs of the district. This includes meeting the legal, state & federal mandated, contractual, and financial requirements necessary in order to operate as a school district.

The third priority is to provide a high quality suite of technology tools and resources to all staff and students across the district.

The fourth priority is to support staff and students utilizing specific tools outside the "technology tools for all".
